## Emergency Department Work/School Note

To whom it may concern:

This certifies that YOSHIMOTO, AYAE was a patient in the MedStar Georgetown University Hospital Emergency Department from 01/04/25 14:52:00 until 01/04/25 21:52:21

**NOTE:** This note is **only** to show your employer/school that you were seen by a physician and/or physician's assistant in evaluation of an acute illness or injury.

Complete days off are provided only for a severe medical illness. The Emergency Department staff cannot decide whether or not you can work due to an injury. If you were assigned "light duty (partial disability)", the note above describes what type of physical activity is limited. Your work supervisor needs to determine if there is light duty available or make other arrangements for you. If you feel a need for additional days in light duty status, you will need to contact and follow up with another clinician as noted in your discharge instructions.

If you feel that you need additional days off due to illness, you will need to contact and follow up with another clinician as noted in your discharge instructions.

The Emergency Department staff does NOT determine total disability due to injury.

## Emergency Department

### Patient Discharge Instructions For YOSHIMOTO, AYAE

Thank you for choosing MedStar Georgetown University Hospital for your health care needs. Our entire staff strives to make your experience in the Emergency Department positive and reassuring. We are committed to providing the very best in safety, quality and service. Within the next few weeks, you may receive a mail, email, or text survey from Press Ganey asking about your experience while you were here. Your feedback helps us identify ways we can better address your needs and continually improve your overall experience. We appreciate you taking the time to participate in the survey and share your feedback about your experience.

If you need assistance finding a physician or scheduling an appointment, please go to **[georgetownuniversityhospital.org](http://georgetownuniversityhospital.org)**. You may either click the blue "Find a Doctor" box, or click the blue "Request an Appointment" box to fill out a form to request an appointment. Please return to the emergency department if worsening symptoms or pain, trouble breathing, or any other concerns. The following includes patient education materials and information regarding your injury or illness.

**Want to say thank you to your nurse? Share your story of compassionate and skillful nursing care. Scan the QR code from your smart phone or email your Daisy nomination to [Jasmine.A.Barnes@medstar.net](mailto:Jasmine.A.Barnes@medstar.net)**

## Patient and Medication Education

You were seen in the emergency department with chest pain. Your labs showed no sign of a clot or heart inflammation. Your EKG was normal, and your chest x-ray was also normal. I am able to recreate your chest pain by pressing on your ribs, which suggest that your pain is musculoskeletal in nature. Please use heat packs, take ibuprofen, and warm showers to help with the discomfort.

You also describe some longer-term symptoms such as weight loss, decreased appetite, and fatigue. I have sent Lyme testing at your request, and recommend that you follow-up with your primary care doctor.

Please return to the emergency department if you have difficulty breathing, cannot stay hydrated by mouth, any new or and/or concerning symptoms.

### MedStar Chest Pain Discharge Patient and Family Education

#### Information About Your Diagnosis

##### Chest Pain

What you should know about this problem:

There are many things which cause chest pain and make people come to the Emergency Room. Some of these things need to be taken care of right away in the hospital, but others can be taken care of outside of the hospital. Pain in your chest may be coming from problems with your heart, lungs, stomach, muscles, ribs, gallbladder or bones. While there are many ways doctors can find the cause of your chest pain, sometimes more testing is needed to make sure it is not something more serious or life-threatening. This is why you may need more tests after you leave the Emergency Room. Make sure you follow the directions given to you by your Emergency Room doctor.

**Go back to the Emergency Room right away if you feel:**

- Chest pain that feels like crushing, squeezing, tightening or pressure.

### **Patient Viewable Documents**

As required by the above referenced legislation, you are receiving this notice regarding the test for Lyme Disease that has been ordered by your physician:

*"Your health care provider has ordered a laboratory test for the presence of Lyme disease for you. Current laboratory testing for Lyme disease can be problematic and standard laboratory tests often result in false negative and false positive results and, if done too early, you may not have produced enough antibodies to be considered positive because your immune response requires time to develop antibodies. If you are tested for Lyme disease and the results are negative, this does not necessarily mean you do not have Lyme disease. If you continue to experience unexplained symptoms, you should contact your health care provider and inquire about the appropriateness of retesting or initial or additional treatment."*

Please consult your health care provider for questions about your symptoms, test, or results.
